PROBLEM WITH FLIES IN GREAT SNORING VILLAGE

The Parish Council is aware that some people have had to endure a summer of their properties being invaded by flies. For some it has happened in previous years, for others it is a new experience, but either way the Parish Council wants to try to ensure it does not occur again. Below is a short survey which we would like you to complete so that we have an accurate picture of the true extent of the problem. Please fill it in even though you might have been relatively fly free, it may be that where the flies weren't is as important as where they were.

All information will be treated in the strictest confidence and in accordance with the Parish Council's Data Protection Policy (available to view on the website – details above).

Once we have all the replies, we will share it with Environmental Health. Hopefully, working together, the source(s) of the flies will be identified and action taken so that everyone can enjoy their homes next summer.

Thank you.

Vanessa Thompson – Chair, Great Snoring Parish Council

Please circle as applicable

Have you had an unacceptable* amount of flies in your property this year? **Yes / No**

**Unacceptable means you had problems when eating your meals; weren't able to open windows freely; had a significant number of flies in your property at any one time.*

Which month did this start to occur?

Have you reported the problem to Environmental Health? **Yes / No**

Has this happened before? **Yes / No** If so which year(s)?

Has the weather made a difference - higher temperatures, overcast or rain, wind direction etc? Please give details.

Any other comments:

Address: (please provide this so we can plot where the worst affected areas have been)

Contact details: Please provide if you would be happy to be contacted either by the Parish Council or Environmental Health

Please return by October 17th to any of the Parish Councillors or by post or email to the Parish Clerk.
